QUALITY AND ENVIRONMENTAL POLICY

ALLCOT Group is an international company focused on delivering services related to energy & sustainability and trade, including carbon credits.

ALLCOT's value takes root in its technical capability, translated into vast experience and knowledge on the sustainability arena.

Part of ALLCOT'S DNA is the protection of the environment and therefore everything we do is carefully planned and monitored so that our activities have the least impact on the environment possible. Our most important environmental impacts are related to carbon emissions, waste production and consumption of natural resources.

To ensure we continually improve the management system performance and the Groups' environmental performance we certify our management system to ISO 9001:2015 and ISO 14001:2015, in the Madrid and Zug offices.

Senior Management of Group ALLCOT assumes the following commitments:

- To provide services that support our customers' environmental performance and reputation risks management, underpinned by the full engagement of employees and suppliers;
- To create and maintain a quality-oriented culture, which is assumed by the totality of employees and constitutes the base of our activity;
- To direct our efforts to a constant improvement of the quality of our services and the efficiency of our processes, in such a way that the capacity of reaction and adaptability of ALLCOT overcome the expectations of the market;
- To comply with all the applicable legal requirements and others that we voluntarily adhere to, including international best practice related to carbon services;
- To ensure that employees have the training level, motivation and technical means for the efficient development of their activities.

The policy is communicated to all staff and made available to all external interested parties.
